Git, Docker

// Languages

Turkish (Native)
English (Read and Write)

I have been developing websites and applications professionally with PHP since 2008. I describe myself as an open source volunteer and Unix lover. I like to create and learn new things.

// Work Experiences

Back-end Developer – Biliver (03/2012 – 06/2021)

I carried out the processes of developing algorithms and software, rewriting the code-base in accordance with current standards, and deployment the software.

Full-stack Developer – Freelance (2008 - 02/2012)

- I designed and managed corporate websites.
- In this process, I developed various wordpress plugins.
- I developed e-Commerce, CMS, web based CRM and B2B applications using Codeigniter.

// Projects

InitPHP – Founder & Developer (11/2021 - ...)

It is an open source project that emerged with the principle of simplicity and modularity. Some of the libraries I have developed under this project are;

- *Database* (QueryBuilder, DBAL and ORM)
- *Barbarian* (Migrations & Seeders)
- *Cache* [File, Memcache(d), Wincache, Redis, PDO]
- *Socket* [TCP, TLS, UDP, SSL] (Server and Client)
- *Router* [GET, POST, PUT, PATCH, DELETE, HEAD, OPTIONS and Ajax Variants]
- *Encryption* [OpenSSL, Sodium]
- ...

initphp.org | github.com/InitPHP

Vidivo – Founder & Developer (2013 – 2018)

It was a Video/Music search and playback service. It was performing content search (filtering) using APIs of universal and local video sharing services such as Youtube and Vimeo. I had to terminate the project for legal reasons such as copyright.

WorkForOSS – Developer (2008 – 2009)

It was an online exam/test application used by high school students to prepare for the university exam. Written using PHP4 and MySQL. It was purchased by an educational institution in an short time.
